Overview

Data Binding Syntax with ngModel

Create Employee Model

Bind to the Model

Calling a Method when Binding

Bind to:
- checkboxes
- radio buttons
- select control

Data Binding and ngModel

```html
<!-- no binding -->
<input name="firstname" ngModel>

<!-- one way binding -->
<input name="firstname" [ngModel]="firstName">

<!-- two way binding -->
<input name="firstname" [ngModel]="firstName"
                        (ngModelChange)="firstName=$event">

<!-- two way binding -->
<input name="firstname" [(ngModel)]="firstName">
```

Summary
